### **Medina County Emergency Services District #5**

### Management's Discussion and Analysis

As management of the Medina County Emergency Services District #5, we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the Medina County Emergency Services District #5 for the year ended December 31, 202. The District's financial performance is discussed and analyzed within the context of the accompanying financial statements and disclosures following this section.

#### Financial Highlights

- The assets of the Medina County Emergency Services District #5 exceeded its liabilities at the close of the 2022 year by \$1,298,084 (net position). Of this amount, \$1,066,690 (unrestricted net position) may be used to meet the District's ongoing obligations to citizens and creditors.
- As of the close of the current fiscal year, the Medina County Emergency Services District #5's governmental funds reported combined ending fund balances of \$1,190,809. 85 percent of this total amount, \$1,010,770 is available for spending at the government's discretion (unassigned fund balance).
- At the end of the current fiscal year, unassigned fund balance for the general fund was \$1,483,503, or 247 percent of total general fund expenditures, and 289 percent of the general fund revenues.

Overview of the Financial Statements. This discussion and analysis are intended to serve as an introduction to the Medina County Emergency Services District #5's basic financial statements. The Medina County Emergency Services District #5's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the Medina County Emergency Services District #5's finances, in a manner similar to a private-sector business.

The <u>statement of net position</u> presents information on all the District's assets and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The <u>statement of activities</u> presents information showing how the District's net position changed during the most recent fiscal year. All changes in the net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows. Thus, revenues and expenses are reported in the statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the Medina County Emergency Services District #5 that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the Medina County Emergency Services District #5 include administration and fire protection.

The government-wide financial statements can be found on pages 8-9 of this report.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Medina County Emergency Services District #5, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the District can be reported in one category: governmental funds.

Governmental Funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statement, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of the governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. The Medina County Emergency Services District #5 adopts an annual appropriated budget for its general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

Notes to the Financial Statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 10-16 of this report.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents certain statistical supplementary information. Statistical and supplementary information can be found on pages 17-18 of this report.

#### Financial Analysis of the District as a Whole

As year-to-year financial information is accumulated on a consistent basis, changes in net position may be observed and used to discuss the changing financial position of the District as a whole.

The District's net position at fiscal year-end are \$1,298,084. This is a \$230,659 increase over last year's net position of \$1,067,425.

The following table provides a summary of the District's net position at December 31:

#### **Summary of Net Position**

_		mmental civities	Amount Change	% Change
	2022	2021		
Current and other assets \$	1,646,729	\$ 1,019,715	627,014	61.49%

#### NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Medina County Emergency Services District #5 was created by the voters of the District in a special election conducted November 14, 2006 as authorized by the Texas Health and Safety Code Chapter 775. The District is governed by a five member Board of Commissioners appointed by the County Judge.

Reporting Entity: The reporting entity is defined as the primary government and those component units for which the primary government is financially accountable. Financial accountability is defined as appointment of a voting majority of the component units board of directors and either I) the ability to impose will by the primary government, or 2) the possibility that the component unit will provide a financial benefit to or impose a financial burden on the primary government. The District does not have any component units. The District is not a component unit of any other entity.

Government-wide and Fund Financial Statements: The government-wide financial statements include the statement of net position and the statement of activities. These statements report financial information for the District as a whole excluding any fiduciary activities. Individual funds are not displayed but the statements distinguish governmental activities, generally supported by taxes and District general revenues, from business-type activities, generally financed in whole or in part with fees charged to external customers.

The statement of activities reports the expenses of a given function offset by program revenue directly connected with the functional program. A function is an assembly of similar activities and may include portions of a fund or summarize more than one fund to capture the expenses and program revenues associated with a distinct functional activity. Program revenues include: (1) charges for services which report fees, fines and forfeitures, and other charges to users of the District's services; (2) operating grants and contributions which finance annual operating activities including restricted investment income; and (3) capital grants and contributions which fund the acquisition, construction, or rehabilitation of capital assets and include fees to developers. These revenues are subject to externally imposed restrictions to these program uses. Taxes and other revenue sources not properly included with program revenues are reported as general revenues.

Fund financial statements are provided for governmental funds.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation. The financial statements of the Medina County Emergency Services District #5 have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the primary standard-setting body for establishing governmental accounting and financial reporting principles.

The government-wide statements report using the economic resources measurement focus and the accrual basis of accounting generally including the reclassification or elimination of internal activity (between or within funds). Proprietary fund financial statements also report using this same focus and basis of accounting although internal activity is not eliminated in the statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property tax revenues are recognized in the year for which they are levied while grants are recognized when grantor eligibility requirements are met.

December 31, 2022 Governmental fund financial statements report using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they are both measurable and available. Available means collectible within the current period or soon enough thereafter to pay current liabilities. Expenditures are recorded when the related find liability is incurred, except for general obligation bond principal and interest which are reported as expenditures in the year due. Major revenue sources susceptible to accrual include: property taxes, intergovernmental revenues, and investment income. In general, other revenues are recognized when cash is received. Fund Types and Major Funds Governmental Funds The District reports the following major governmental funds: General Fund - reports as the primary fund of the District. This fund is used to account for all financial resources not reported in other funds. Debt Service Fund - accounts for revenues generated and expenditures made for the retirement of general long-term Capital Assets and Depreciation. The District's property, plant, equipment, and infrastructure with useful lives of over one year are stated at historical cost and comprehensively reported in the government-wide financial statements. The District maintains infrastructure asset records consistent with all other capital assets. Donated assets are stated at fair value on the date donated. The costs of normal maintenance and repairs that do not add to asset value or extend useful lives are not capitalized. Capital assets are depreciated using the straight-line method. When capital assets are disposed of, the cost and applicable accumulated depreciation are removed from the respective accounts, and the resulting gain or loss is recorded in operations. Estimated useful lives, in years for depreciable assets are as follows: **Buildings** 5 - 50 Improvements, other than buildings 2 - 50Furniture, machinery, and equipment 3 - 30

### Reconciliation of Government-wide and Governmental Fund Financial Statements

Reconciliation of Governmental Fund Balance to Net Position of Governmental Activities December 31, 2022								
Total Governmental Fund Balance	\$	1,190,809						
Amounts reported in governmental activities in the statement of net position are different because:								
Capital assets used in the governmental activities are not financial resources and therefore are not reported in the governmental funds. In addition, long-term liabilities are not due and payable in the current period, and therefore are not reported as liabilities in the funds. The net effect of including the beginning balances for the capital assets (net of depreciation) and long-term debt in the governmental activities is to decrese net position.		46,865						
Current year capital outlays and long-term debt principal payments are expenditures in the fund financial statements, but they should be shown as increases in capital assets and reductions in long-term debt in the government wide financial statements. The net effect of including the 2022 capital outlays and other adjustments is to increase								
net position.		64,990						
Accumulated depreciation has not been included in the general fund financial statements.		(60,500)						
Other reclassifications and eliminations are necessary to convert from the modified accrual basis of accounting to the accrual basis of accounting. These include recognizing uneared revenue and adjusting prior year's delinquent taxes from unearned revenue								
to beginning net position.	_	55,920						
Net Position of Governmental Activities	\$_	1,298,084						

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities

Net Change in Governmental Fund Balances	\$ 441,2
Amounts reported for the governmental activities	
in the statement of activities are different because:	
Governmental funds report capital outlays and principal	
payments on long-term debt as expenditures.	
However, they are reported as increases in capital	
assets in the government-wide financial statements.	64,9
Depreciation is not recognized as an expense in	
governmental funds since it does not require the use	
of current financial resources. The effect of the	
current year's depreciation is to decrease net position.	(60,5
Other reclassifications and eliminations are necessary	
to convert from the modified accrual basis of	
accounting to the accrual basis of accounting. These	
include recognizing unearned revenue as revenue and	
adjusting the current year revenue to show the revenue	
earned from the current year's tax levy.	 (214,1
Change in Net Position of Governmental Activities	\$ 231,5

<u>Estimates.</u> The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

<u>Fund Equity.</u> The District reports fund balances for the governmental funds in classifications based primarily on the extent to which the District is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. The nonspendable classification represents assets that whole be consumed or "must be maintained intact" and therefore will never convert to cash, such as inventories of supplies and endowments. Provisions of laws, contracts and grants specify how fund resources can be used in the restricted classification. The nature of these two classifications precludes a need for a policy for the District Commissioners. However, the Commissioners have adopted fund balance policies for the three unrestricted classifications: committed, assigned, and unassigned.

From time to time, the District Commissioners may commit fund balances by a majority vote in a scheduled meeting. The Commissioner's commitment may be modified or rescinded by a majority vote in a scheduled meeting. Commissioner's commitments cannot exceed the amount of fund balance that is greater than the sum of nonspendable and restricted fund balances since that practice would commit funds that the District does not have. Commitments may be for facility expansion or renovation, program modifications, wage and salary adjustments, financial cushions (rainy day funds), and other purposes determined by the Commissioners.

The District Commissioners may delegate authority to specified persons or groups to make assignments of certain fund balances by a majority vote in a scheduled meeting. The Commissioners may modify or rescind its delegation of authority by the same action. The authority to make assignments shall be in effect until modified or rescinded by the Commissioners by majority vote in a scheduled meeting.

When fund balance resources are available for a specific purpose in more than one classification, it is the District's policy to use the most restrictive funds first in the following order: restricted, committed, assigned, and unassigned as they are needed.

#### NOTE B - DEPOSITS AND INVESTMENTS

#### District Policies and Legal and Contractual Provisions Governing Deposits

<u>Custodial Credit Risk for Deposits</u> State law requires governmental entities to contract with financial institutions in which funds will be deposited to secure those deposits with insurance or pledged securities with a fair value equaling or exceeding the amount on deposit at the end of each business day. The pledged securities must be in the name of the governmental entity and held by the entity or its agent. The District has complied with this law, however, since its cash deposits are fully covered by FDIC insurance, it has no custodial credit risk for deposits.

<u>Foreign Currency Risk</u> The District limits the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit by not participating in foreign currency transactions.

District Policies and Legal and Contractual Provisions Governing Investments

#### Compliance with the Public Funds Investment Act

The Public Funds Investment Act (Government Code Chapter 2256) contains specific provisions in the areas of investment practices, management reports, and establishment of appropriate policies. Among other things, it requires a governmental entity to adopt, implement, and publicize an investment policy. That policy must address the following areas: (1) safety of principal and liquidity, (2) portfolio diversification, (3) allowable investments, (4) acceptable risk levels, (5) expected rates of return, (6) maximum allowable stated maturity of portfolio investments. (7) maximum average dollar-weighted maturity allowed based on the stated maturity date for the portfolio. (8) investment staff quality and capabilities. (9) and bid solicitation preferences for certificates of deposit.

Statutes authorize the entity to invest in (1) obligations of Use U.S. Treasury, certain U.S. agencies, and the State of Texas. (2) certificates of deposit, (3) certain municipal securities. (4) money market savings accounts, (5) repurchase agreements, (6) bankers acceptances. (7) mutual funds, (8) investment pools, (9) guaranteed investment contracts, (10) and common trust funds. The Act also requires the entity to have independent auditors perform test procedures related to investment practices as provided by the Act. Lower Trinity Groundwater Conservation District is in substantial compliance with the requirements of the Act and with local policies.

As of December 31, 2022, Medina County Emergency Services District #5 had the following investments:

	Investment Maturities (in years)								
Investment Type	Fair Value	Less Than 1	More Than 1	Credit Rating					
Certificates of Deposit	·_\$	\$ -	\$ <u>-</u>	1					

Additional polices and contractual provisions governing deposits and investments for Medina County Emergency Services District #5 are specified below:

<u>Credit Risk</u> To limit the risk that an issuer or other counterparty to an investment will not fulfill its obligations the District limits investments to depository bank certificates of deposits and state sponsored investment pools.

<u>Custodial Credit Risk for Investments</u> To limit the risk that, in the event of the failure of the counterparty to a transaction, a government will not be able to recover the value of investment or collateral securities that are in possession of an outside party the District requires counterparties to register the securities in the name of the District and hand them over to the District or its designated agent. All of the securities are in the District's name and held by the District or its agent.

<u>Concentration of Credit Risk</u> To limit the risk of loss attributed to the magnitude of a government's investment in a single issuer, the District investments in both depository bank certificates of deposits and state sponsored investment pools.

<u>Interest Rate Risk</u> To limit the risk that changes in interest rates will adversely affect the fair value of investments, the District requires the investment portfolio to have maturities of less than two years on a weighted average maturity basis.

<u>Foreign Currency Risk for investments</u> The District limits the risk that changes in exchange rates will adversely affect the fair value of an investment by not investing in foreign currencies.

#### NOTE C - PROPERTY TAX

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and are due and payable before January 31 of the following year. All unpaid taxes become delinquent February 1 of the following year. The appraisal of property within the District is the responsibility of the Medina County Appraisal District, which is required to assess all property within the District on the basis of 100% of its market value and is prohibited from applying any assessment ratios. The total assessed value at January 1, 2021, upon which the fiscal 2022 levy was based was \$578,733,000.

General property taxes are limited by the Texas Constitution to \$2.50 per \$100 of assessed valuation. The combined tax rate to finance general government service for the year ended December 31, 2022, was \$.1 per \$100 of assessed valuation.

Current tax collections for the year ended December 31, 2022, were 30% of the tax levy.

NOTE D - CAPITAL ASSETS

### Schedule of Changes in General Fixed Asset FYE 12/31/22

		Beginning Balances		Increases	Decreases	 Ending Balances
Capital assets being depreciated:				,
