

CWD Volunteer Sample Form Landowner Commitment

Texas Parks and Wildlife has proposed a mandatory CWD testing zone for NW Medina, NE Uvalde, and SW Bandera Counties. The proposal states that all white-tailed deer harvested in this zone shall be tested for CWD. Further, the proposal restricts movement of parts of the deer carcass (spine and head) from the zone. Due to the negative impact this could have on land values and businesses, we are proposing a volunteer testing program. In order for Texas Parks and Wildlife to replace the mandatory zone with a volunteer zone, they need assurance that a sufficient number of samples will be collected from this area. Therefore, we are asking you to commit to sampling for CWD on your property.
